These cover notes list the GMO PCR tests performed on the 1 samples received for analysis on 6/4/2002. Individual GMO Analytical Reports for each sample follow separately. For your information and where applicable, additional notes pertaining to each sample's result are detailed below. These notes are not included on the assay report.
We thank you for the opportunity to serve you.

GID Sample Code	Date	Tests Performed	Results(s)	Comments
020604 B18	6/7/02	Corn/Maize Reference Gene	Corn DNA detected at normal levels	
World Food Program food aid From: El Jicaró, municipio del departamento del Progreso, Guatemala; obtained by Colectivo MadreSelva		Inhibition Test	No inhibition observed	
		Liberty Link (AgrEvo T14) Single-Threshold Quantitative	Greater than 0.1%	Close to 0.1%
		GR (Dekalb DLL25) Single-Threshold Quantitative	Negative at the operational limit of quantitation of 0.1%	No GMO detected
		RoundUp Ready (Mon GA21) Single-Threshold Quantitative	Greater than 0.1%	
		BitXtra (Dekalb DBT418) Single-Threshold Quantitative	Negative at the operational limit of quantitation of 0.1%	Present, but less than 0.1%
		Starlink (AgrEvo CBH351) Single-Threshold Quantitative	Negative at the operational limit of quantitation of 0.1%	No GMO detected
		RoundUp Ready (Monsanto NK603) Single-Threshold	Negative at the operational limit of quantitation of 0.1%	No GMO detected
